

META<>CRILL®

Beauty and youth

Polymethylmetacrylate microspheres (PMMA) of 30 to 50 µm of smooth regular surface, free of impurities, suspended in a biologically inert carboxymethylcellulose colloid, which stimulates the patient's collagen production in the implant point.

META<>CRILL® is a fascinating injectable and biocompatible filling, which gives a younger and more beautiful image.

The implant point depends on the indications. In wrinkles or grooves, it is applied in the subcutaneous cellular tissue. In the buttocks, injection is intramuscular. To increase the osseous, cheek, chin and jaw eminences, it is applied next to the bone. In this manner, the tissues maintain a natural look and feel.

PRESENTATIONS:

- Box containing (1) 10 ml bottle at 30%
- Box containing (10) 1 ml syringes at 2%
- Box containing (10) 1 ml syringes at 10%

young*

META<>CRILL®

Permanent injectable implant which enhances beauty, corrects signs of aging and masks aesthetic defects.

Manufactured by Nutricel for Euroquirurgica, exclusive representative in the European Union.

META<>CRILL®

It is unique because:

SECURITY

A study performed over 7 years on 84,000 patients with 252,000 treated areas showed a minimal index of complications (0.08 %).

QUALITY

Scientifically proven. META<>CRILL® has undergone microbiological, histological and biocompatibility testing. Its manufacture is subjected to stringent quality controls.

CREDIBILITY

It has passed the rigorous controls of the European Union (CE Certified).

Manufactured in Brazil, a leading country in Cosmetic Surgery. The production has certified Quality System (ISO 13485:2003 and ISO 9001:2008).

Antiallergenic • Rejection-proof
Does not migrate • Non-toxic
No animal products • No side effects

*Injectable implant of immediate and permanent action
Biocompatible, inert and 100% sterile*

TRANQUILITY

It does not require hospitalization, surgery or anaesthesia.

EASE

Application is fast and the results are immediate and permanent, leaving the tissues with a natural look and feel.

ACCESIBILITY

It is the treatment with the best value for money.

META<>CRILL®

Principal Indications

FACE

FACIAL CONTOUR AND PROFILE

- Grooves and asymmetry in profile.
